## NovaCloud 101: A Comprehensive User Guide

### Welcome to NovaCloud

Your gateway to easy and affordable cloud computing. With NovaCloud, you can effortlessly spin up a cloud server in less than 8 minutes, enjoy on-demand scalability within 5 minutes, and safeguard your hourly, daily, and weekly data —all for FREE.

### **NovaCloud Highlights**

Payment Methods	<ul> <li>Pay-per-use: Take control of your Virtual Machine (VM) independently.</li> <li>Subscription-based: Our expert team handles VM provisioning for you.</li> <li>Enjoy 1TB of data transfer for free, every month.</li> </ul>
Key Features	<ul> <li>Quick Deployment: Set up in under 8 minutes. Start as low as MYR0.06/hour.</li> <li>Scalability: Easily adjust resources in under 5 minutes.</li> <li>Security Rules: Set your preferred security settings by enabling or disabling ports.</li> <li>OS Support: Compatible with Linux and Windows.</li> <li>Low latency: Deploy your services in regions including Malaysia, Singapore, and Hong Kong.</li> <li>One-click Application: Easily deploy a VM with pre-installed apps like MSSQL, Deploy Marginson</li> </ul>
	Spanshet Deskuper Safeguerd your date with free hours, daily, and weakly
Data Protection	<ul> <li>Snapshot Backups: Safeguard your data with free hourly, daily, and weekly backups.</li> <li>ISO Certification: NovaCloud employs ISO-certified technology and processes for enhanced security.</li> <li>HA Environment: Operates in a high-availability (HA) environment, ensuring uninterrupted service.</li> <li>99.9% Uptime: NovaCloud guarantees 99.9% uptimes on network and compute availability.</li> <li>Redundant Infrastructure: Designed to eliminate single points of failure, using advanced spine and leaf switching. Multiple SAN storage units ensure constant service availability.</li> </ul>

NovaCloud 101: A Comprehensive User Guide

#### IP ServerOne Solutions Sdn. Bhd.

## **Getting Started**

1. For new users, you can create your account here.

## **Prerequisites**

### 3

#### 1. Credit Availability:

Before using NovaCloud services, check your account's available cloud credit by navigating to NovaCloud and reviewing your Available Balance.

Malaysia (MYS1a)	Default Project	•		BALANCE: MYR 76	0.24 TOP UP
C Instances	Q		6 / 30 🛈	CLOUD CALCULATOR	LAUNCH INSTANCE
Name	Plan	Status	Primary IP		

#### 2. Cloud Credit Top Up:

One-time Top Up: Learn how to top up your cloud credit here.

New Order 🔸 I	PS1 Cloud Platfo	orm					
Ensure to Have Enough Top up or add balance to y	n Credit our OpenStack account to e	njoy hourly billing and pay	r-as-you-go.				
Your current cloud cre	dit balance is MYR						
Click on any of the follow	ving amount to add to cart						
MYR 50.00	MYR 100.00	MYR 250.00	MYR 500.00	MYR 1000.00	MYR 2500.00	MYR 5000.00	MYR 10000.00
Launch an Instance After topping up your acco + Create New Instance	unt, launch your instance w	ith just a few clicks to enjo	y flexibility and instant prov	isioning with IPSERVERONE	's Cloud Platform.		
🐐 TO KNOW MORE							
PAY-AS-YOU-GO							
If you do not expect to ru hourly billing.	In your servers at all time	s, this billing option will b	be the best fit which provi	des you with the flexibilit	ty you need. Top up or add	l balance to your OpenSta	ack account to enjoy
Controlling your account b your server(s) are off, you	alance is very simple as IPSe are not billed for network/ba	erverOne's Cloud Platform andwidth usage. However,	is a prepaid system. Top up we keep the server ready fo	your account, and your ser or use when you need it, so	rvice usage will be then ded you will be charged for the	ucted on an hourly basis fr static resources such as st	om this credit. When orage and memory.

Automated Top Up: Set up automated cloud credit top-ups for peace of mind.

#### **AUTO CLOUD TOP UP**

## **Deploying Your First Instance**

Back to Table of Contents

1. **Choosing Your Region:** Select from the Malaysia, Singapore, or Hong Kong regions for your instance. Choosing the right regions will make an impact on your service latency. Check out our network latency here.

Network Latency	Malaysia	Singapore	Hong Kong
Singapore	6-7ms	<1ms	35-40ms
Thailand	23-35ms	26-35ms	50-65ms
Vietnam	39-60ms	33-50ms	51-206ms
Combodia	27-45ms	23-40ms	42-80ms
Indonesia	19-30ms	12-25ms	45-55ms
Phillipines	34-40ms	192-200ms	39-45ms
China	100-350ms	100-350ms	100-350ms
*China Premium Route *Available at additional charges	42-50ms	36-45ms	6-20ms

- 2. **Deployment Method**: NovaCloud offers 4 types of methods to provision a cloud server. You can choose the following instance deployment method that suits your needs or familiarity.
  - Launch instance from Image
  - Launch instance from Snapshot
  - Launch instance from Volume
  - Launch instance from One-Click Application

IPSERVER ANE"	NEW ORDER				Submit Ticket
Dashboard	Step 1		Step 2	Complete!	<ul> <li>Quick Links</li> <li>Manage Cloud Platform</li> </ul>
Networks Public Keys Security Groups Volumes	Welc At this str predefine	come ep, you need to choose w ed volume or a one-click a	hether you want to launch your in: pplication.	Instances	Launch first Cloud Instance via Image     Launch Cloud Instance via Snapshot     Launch first Cloud Instance via One-Click     Application     Log in to Cloud Instance     Retrivee Windows Instance admin password     Remote access to Windows server
Snapshots DNS Load Balancers Redis	Cr	eate Instance from Image	Create Instance from Volume / Snapshot	Create Instance from One-Click Application	Common Cloud Platform FAQ Can I request refund on my Cloud Platform Credit top up?
Memcached Object Storage		Details	Details	Details	How do I store credit card information + for future transaction?
Limits Data Transfer					Credit card payment cannot go + through, it says "We are processing
Transactions					your request"

Instance Deployment Method	Description
Image	Choose this option if you want to build a completely new server. You can select the operating system, com- puting resources, and storage that suit your needs.
Snapshot	Use this if you already have a snapshot backup in NovaCloud. It lets you deploy a new server using the state of a system at a particular point in time.
Volume	You can use this choice to set up a new server by attaching it to an existing volume in NovaCloud. This option lets you restore your instance if any issues arise or you need to undo any changes.
One-Click Application	Great for software developers who want to save time. This method launches a server with pre-installed apps such as Docker, MSSQL, WordPress, LAMP, and more without manual setup.

#### 3. Configuring Instance Details:

- Choose your preferred plans, from General to RAM-optimized.
- Select your storage size.
- Name your instance.
- Import or generate a public key (save it securely).
- Configure security rules (if any).

Back to Table of Contents

### 4. Congratulations! Your first instance has been successfully created.

inapshots					Shelve
DNS					Resize
oad Balancers					Rebuild
edis					Retrieve Password
lemcached					Manago Socurity Groups
bject Storage					Manage Security Groups
imits					View Networks
Data Transfer					Rename
Fransactions					Delete

Console	Connect to your instance just like plugging a wire from your PC to the cloud server. Check out our guide here.
Stop	Completely stop the instance, like powering off your computer.
Reboot	Restart the instance, similar to clicking the restart button on your computer.
Shelve	Putting your instance into storage mode. Charges are incurred only for your storage and IP address.
Resize	Upgrade or downgrade your server specifications (e.g C1 to C2 or C2 to C1). Downtime is less than 5 minutes. Check out our guide here.
Rebuild	Reformat the instance like it's fresh, wiping out all data but retaining the IP address and operating system (OS).
Retrieve Password	Retrieve admin passwords for Windows instances. Check out our guide here.
Delete	Deleting an instance removes all your data permanently. Remember, you'll still be charged for any volumes, even if they're not attached to an instance. Make sure to delete volumes accordingly. Check out our guide here.
Manage Security Groups	This acts as the first layer of the firewall between your instances. You can restrict access to certain ports.

#### IP ServerOne Solutions Sdn. Bhd.

## **Data Storage and Management**

Back to Table of Contents >

	VORDER		Submit Ticket	
Dashboard	Malaysia (MYS1a) 👻	Default Project 🔹	Available Balance:	MYR 797.57 Top Up

Volume and Snapshot	You can create a volume or snapshot for each instance. Later on, you can use it to spin up an instance (similar to cloning an instance).
Extend, Attach, Detach	Manage volumes by extending, attaching, or detaching.
Automated Backups	NovaCloud offers free snapshot backups to protect your hourly, daily, and weekly data. Note that restoring data incurs SmartHand charges.
Object Storage	Pair with our Object Storage for flexible data storage and retrieval.

### **Use Cases**

Back to Table of Contents >

NovaCloud is versatile and caters to various use cases, including:

- Website hosting
- Application hosting
- E-commerce
- / Databases
- / Email servers
- Mobile applications

## **Security Best Practices**

Enhance the security of your instances with these best practices:

### **Advanced Features**

Explore additional NovaCloud offerings, such as:

Back to Table of Contents >

IP ServerOne

#### Load Balancer as a Service (LBaaS):

Distribute incoming traffic across multiple instances to ensure high availability and reliability. Ideal for handling varying workloads and increasing application performance. See guide here.

**Object Storage:** A scalable and secure solution for storing and retrieving large amounts of unstructured data. Ideal for backups, archives, and content distribution.

DNS Hosting: Manage your domain's DNS records efficiently, ensuring seamless connectivity to your cloud resources.

Premium China Route: Improve performance and reduce latency by directing your traffic directly to China. Manual configuration and subscription required. Contact IP ServerOne to learn more.

## For extensive support, consider subscribing to our **NovaCloud Care** - a managed service by IP ServerOne.

NovaCloud Care by IP ServerOne is a managed service that optimizes your NovaCloud environment, allowing you to focus on your business. Our experts handle infrastructure management for optimal performance, security, and reliability, reducing downtime and ensuring data security. Perfect for businesses that want to leverage the cloud without the hassle of managing it.

Category	Scope Description
	Regular kernel updates for Linux and Windows environments
Operating System Management	*Migration fee is incurred for windows version upgrade
Control Panel Support	Software uptime and basic configuration support (excludes user account configuration)
	Assistance with basic load balancing for applications and websites (if applicable)
Configuration Assistance	Assistance with security configuration for web applications and networks (if applicable)
	Basic configuration assistance for firewalls, VPNs, and secured networks (if applicable)
Vulnerability Management	Proactive vulnerability scans conducted twice a year upon request
SSL Certificate Management	Professional installation of SSL certificates for servers hosted with IP ServerOne
Data Protection	Snapshot backup technology:         • Hourly Backup: Last 15 hours         • Daily Backup: Last 7 days         • Weekly Backup: Last 4 weeks         Snapshot restorations:         • Weekdays: RM350 per hour         • Weekends: RM700 per hour         Note: Actual restoration fees may vary based on data size and complexity of the restore process.
Service Monitoring	24×7 monitoring powered by Zabbix Monitoring System
Support Services	24x7 support ticketing services

## **Tips and Tricks**

Back to Table of Contents

# Key differences between Image, Snapshot, Volume, and One-Click Application

Aspect	Image	Snapshot	Volume	Pre-installed App
Definition	To launch a fresh new server with a choice of OS	A server is the state of a system at a particular point in time.	A server uses an existing disk and easily undoes any changes.	A server image with pre-installed apps and settings
Prerequisite	None	Have an existing snapshot in NovaCloud.	Have an existing volume in Nova- Cloud.	None
Limitation	Limited to the template's pre-configured settings.	Only captures disk state, not entire server settings.	May not be suitable for booting or OS.	Limited to the pre-installed apps.
Use Cases	Quick VM deployment with granular customization	Data backup and recovery	Data growth, cost control, and high-performance databases	Rapid deployment of app environments.
